

Pre-tied labor saving solutions!

# PRE-ASSEMBLED CEILING WIRES

## How to Order Pre-Assembled Ceiling Wire Assemblies

### Select the Assembly for your Application

Select from any **Concrete, Metal Deck** or **Wood Assembly** Note: PT = (Pre-Tied)

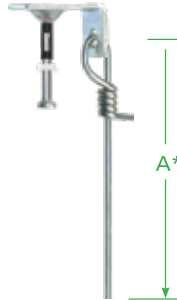

PT \_\_\_ PP

Example shown = PP (PowderPuff Pin & Clip)

### Determine the Wire Length

\*Actual pre-tied wire lengths are roughly 6" shorter than the length specified due to the wrap.

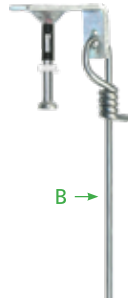

PT 6 PP

Wire Length

A - Example shown = 6'

### Determine the Wire Gauge (12g typ)

- 8 Gauge (.162) Typical ultimate capacity = 1440 lbs
- 9 Gauge (.147) Typical ultimate capacity = 1190 lbs
- 10 Gauge (.135) Typical ultimate capacity = 800 lbs
- 12 Gauge (.105) Typical ultimate capacity = 600 lbs

PT \_\_\_ 12 PP

Wire Gauge

B - Example shown = 12g

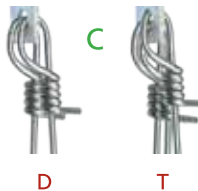

**Note: If Ordering Single Wire Tie Stop Here**

8, 9, 10 and 12 gauge wire typical tensile strength = 70ksi (Meets ASTM A 641 Specs)

### Choose Double or Triple Wire Tie

Add "D" for Double Tie or "T" for Triple Tie to the end of the part number when ordering

PT \_\_\_ PP D

Wire Tie

C - Example shown = Double Wire Tie

### Examples

Part Number Example #1: **PT612PP** = Pre-Tied, 6' Long, 12g Wire, CEAS PowderPuff Pin and Clip

Part Number Example #2: **PT612PPD** = Pre-Tied, 6' Long, 12g Wire, CEAS PowderPuff Pin and Clip, Double Tie

*Many other manufactured and custom assemblies are available. Contact CEAS for more ordering options!*
