

90° 3" x 4" Seismic Plate

Pre-tied Wire Assemblies

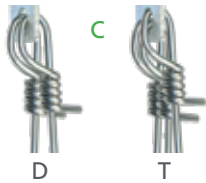

- 90° 3" x 4" Seismic Plate (Meets California DSA and OSHPD requirements)
- Part # SP90
- Pre-tied Part # PT __ SP90

ATTACHMENTS

Many other manufactured and custom assemblies are available. Contact CEAS for more ordering options!

**Actual pre-tied wire lengths are roughly 6" shorter than the length specified due to the wrap*

Note: If ordering single wire tie, you do not need to fill in column C

C = Add "D" for Double Tie or "T" for Triple Tie

How To Order

Step A - Determine the Wire Length

*Actual pre-tied wire lengths are roughly 6" shorter than the length specified due to the wrap

Step B - Determine the Wire Gauge (12g typ)

- 8 Gauge (.162)
- 9 Gauge (.147)
- 10 Gauge (.135)
- 12 Gauge (.105)

8, 9, 10 and 12 gauge wire
typical tensile strength
= 70ksi (Meets ASTM A 641 Specs)

PT __ SP90 __

Step A Wire Length Step B Wire Gauge Step C Wire Tie(s)

Step C - Choose Single. Double or Triple Tie

Add "D" for Double Tie or "T" for Triple Tie to the end of the part number when ordering

Part Number Example #1: **PT612SP90** = Pre-Tied, 6' Long, 12g Wire, 90° 3" x 4" Seismic Plate

Part Number Example #2: **PT612SP90D** = Pre-Tied, 6' Long, 12g Wire, 90° 3" x 4" Seismic Plate, Double Tie
