

- Stiffy Rapid-Attach body provides a modular solution for customizing Stiffy Trees to your project needs
- Stiffy Sock® plastic foot provides a uniform opening to install fasteners and eliminates exposed metal when forms are removed
- Provides rigid support for pipes and conduits in concrete decks prior to the pour
- Support loop design eliminates restraint at the top
- Offers many additional uses
- Barely noticeable from below after forms are removed
- Eliminates the need to support from rebar or plastic chairs that break
- Constructed with zinc coated rod to resist corrosion
